

## Lesson 4: Where does our waste go?

### Learning Objective:

- To identify ways in which people effect the environment
- Investigate ways in which people attempt to look after the present and safeguard the future environment through sustainable development.

### **Teacher Note:**

Ideally this lesson involves an educational visit to the Lamby Way Landfill and Recycling depot. (See **CONTACTS** within teacher zone)

However if this is not possible, show children Powerpoint Presentation of the depot.(See **TEACHER RESOURCES- PRESENTATION**)

### Follow up Activity:

Upper and lower juniors: Make a route map to show the journey the following waste items might take around the Lamby Way site.

- A Christmas tree ( Composting area)
- An old Playstation (Landfill area)
- A coke can (Recycling area- MURF)

Each child will need a blank copy of the Lamby Way site map.. (See **TEACHER RESOURCES- MAPS**) Plot the routes that each item will take on the map. Design a colour coded key.

### Plenary:

Explore **THE LAMBYS** section of the website as a whole class.
